We have audited the accompanying financial statements of Dalhousie Medical Research Foundation (the "Foundation"), which comprise the statements of financial position as at March 31, 2014 and the statements of operations and changes in fund balances, and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

Auditor's responsibility

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Foundation's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Basis for qualified opinion

In common with many non-profit organizations, the Foundation derives revenue from donations from the public, the completeness of which is not susceptible to satisfactory audit verification. Accordingly, our verification of these revenues was limited to the amounts recorded in the records of the Foundation and we were not able to determine whether any adjustments might be necessary to revenues, excess of revenue over expenses, assets and fund balances.

Qualified opinion

In our opinion, except for the possible effects of the matter described in the Basis for qualified opinion paragraph, the financial statements present fairly, in all material respects, the financial positions of the Foundation as at March 31, 2014 and the results of its operations and its cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

Dalhousie Medical Research Foundation

Notes to the financial statements

March 31, 2014

1. Purpose of the Foundation

Dalhousie Medical Research Foundation (the "Foundation") is incorporated under the provisions of the Revised Statutes of Nova Scotia, 1967, the Societies Act. The Foundation provides financial support for research activities in the Faculty of Medicine at Dalhousie University and affiliated teaching institutions.

2. Summary of significant accounting policies

Basis of presentation

The financial statements have been prepared in accordance with Canadian accounting standards for not-for-profit organizations ("ASNPO"). The significant accounting policies are as follows:

Financial Instruments

Initial measurement

Financial instruments are measured at fair value when issued or acquired. For financial instruments subsequently measured at cost or amortized cost, fair value is adjusted by the amount of the related financing fees and transaction costs. Transaction costs and financing fees relating to financial instruments that are measured subsequently at fair value are recognized in operations in the year in which they are incurred.

Subsequent measurement

At each reporting date, the Foundation measures its financial assets and liabilities at cost or amortized cost (less impairment in the case of financial assets), except for investments, which must be measured at fair value. The Foundation uses the effective interest rate method to amortize any premiums, discounts, transaction fees and financing fees to the statement of operations. The financial instruments measured at amortized cost are cash and cash equivalents, receivables and payables and accruals.

For financial assets measured at cost or amortized cost, the Foundation regularly assesses whether there are any indications of impairment. If there is an indication of impairment, and the Foundation determines that there is a significant adverse change in the expected timing or amount of future cash flows from the financial asset, it recognizes an impairment loss in the statement of operations. Any reversals of previously recognized impairment losses are recognized in operations in the year the reversal occurs.

Current year impact on investment income (loss)

During the 2014 fiscal year, the Foundation has recorded net gains on investments totaling \$10,549,306. In accordance with Section 3856, it is necessary for the Foundation to disclose the amount of realized and unrealized income or loss from investments. Realized income is income earned from interest that has been collected or accrued in the current fiscal period along with gains or losses from the disposal of investments. Unrealized income or loss is the amount that is recorded showing the increase or decrease in market value of the investments currently being held by the Foundation at year end. Investment income for the period April 1, 2013 to March 31, 2014 is comprised of \$3,771,669 realized gains and \$6,898,474 unrealized gains on investments, and \$120,837 realized loss on foreign exchange contracts.

Capital assets

Capital assets are amortized on a straight-line basis over their estimated useful lives as follows:

Software	3 years
Computer equipment	3 years
Leasehold improvements	7 years
Furniture	10 years

Dalhousie Medical Research Foundation

Notes to the financial statements

March 31, 2014

2. Summary of significant accounting policies (continued)

Fund accounting

The Foundation follows the restricted fund method of accounting for contributions, which include donations, bequests and proceeds from special events.

The *General Fund* accounts for unrestricted contributions.

The *Restricted Fund* accounts for contributions that have been restricted by a donor for specific research activities and/or area of research. It is the Board's policy to maintain and grow the capital of these funds indefinitely unless otherwise indicated by the donor.

The *Endowment Fund* accounts for contributions whereby the capital is to be maintained permanently either by donor restrictions and/or Board of Directors appropriation.

Revenue recognition

Unrestricted donations, including bequests, are recognized as revenue of the General Fund when received. Those donations, restricted internally by the Foundation for a specific purpose, are transferred to the Restricted Fund.

Restricted donations, including specific bequests designated for specific purposes and/or area of research, are recognized as revenue of the Restricted Fund when received.

Contributions whereby the donor has directed that the capital resource be maintained permanently are recognized as revenue of the Endowment Fund.

Investment income earned on Endowment Fund resources, restricted for a specified purpose, is recognized as revenue of the Restricted Fund and transferred after expenses to the Endowment Fund. Investment income earned on the General Endowment Fund resources is recognized as revenue of the General Fund and transferred after expenses to the Endowment Fund. Where income earned on endowed resources is specifically designated by the donor to return to the principal balance, amounts are shown as revenue in the Endowment Fund.

Restrictions on fund balances

The Foundation has established a resource management policy that stipulates that the economic value of fund balances must be protected by limiting the amount of investment income that may be expended each year on research programs.

To meet the foregoing requirement, the Foundation has established and maintains the following practices:

- research expenditures from any given fund are limited to 5% of the principal balance of that fund at the end of the preceding year;
- if income earned is more than the amount spent, the excess of income will be capitalized to the principal balances; and
- in no case, will the balance in any fund fall below the original contributed amount.

Fund allocations

The Foundation has established a policy of funding operating expenditures through investment income. The net amount of investment income is then allocated proportionately to all funds based on the fund balance of the preceding year, unless specifically attributable to a particular fund.

Dalhousie Medical Research Foundation

Notes to the financial statements

March 31, 2014

2. Summary of significant accounting policies (continued)

Public foundation

As outlined in section 149(1) of the Income Tax Act, the Foundation must spend a minimum of 3.5% of the value of all its property not used directly in charitable activities or administration.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, balances with banks, net of bank indebtedness, and short term deposits with original maturities of three months or less. Bank borrowings are considered to be financing activities.

Donated goods and services

Various organizations donate goods and services to assist the Foundation in carrying out its activities. These contributions have not been reflected in the financial statements.

Contributed services

A number of volunteers contribute a significant amount of their time each year. Due to the difficulty of determining the fair value, contributed services are not recognized in the financial statements unless measurable market value information is readily available.

Investments

Investments are carried at quoted market value. Gains or losses on sales of investments are recognized as investment income in the year of disposal.

Use of estimates

In preparation of the financial statements in conformity with Canadian generally accepted accounting principles, the Foundation's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the year. Actual results could differ from these estimates.

Income taxes

The Foundation is a not-for-profit organization and, as such, is exempt from income tax.

Dalhousie Medical Research Foundation

Notes to the financial statements

March 31, 2014

7. Financial instruments

The Foundation's financial instruments consist of cash and cash equivalents, receivables, investments, payables and accruals, and payable to Dalhousie University. Unless otherwise noted, it is management's opinion that the Foundation is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

Investments held by the Foundation are subject to foreign currency, interest rate, market and credit risk. Investments held are managed by professional investment managers in accordance with the Foundation's Investment Policy developed and monitored by the Investment Committee.

The Foundation does not enter into derivative financial instruments for trading or speculative purposes. As at June 5, 2013, the Foundation cancelled a forward foreign exchange contract to manage its U.S. foreign exchange rate exposure, resulting in a realized loss of \$120,837, which has been included in investment income for the year, and a payout of \$430,982. In 2013, an unrealized mark to market net loss of \$197,154 was recognized and included in investment income for the year and an amount of \$310,145 included in payables and accruals.

8. Capital risk management

The Foundation's capital is comprised of General, Restricted and Endowment Fund balances. The Foundation's objectives when managing capital are to ensure that Funds received are appropriately allocated based upon their intended purpose and that cash and investments are managed to ensure the financial obligations and objectives of the respective Funds are met.

9. Statement of cash flows

The net change in non-cash working capital accounts related to operations represent the following:

	<u>2014</u>	<u>2013</u>
Decrease (increase) in		
Prepays	\$ (4,448)	\$ 2,233
Other receivables	(19,910)	-
Accrued investment income receivable	1,155	109,399
HST receivable	(37,130)	(6,324)
Payables and accruals	<u>(295,329)</u>	<u>279,997</u>
	<u>\$ (355,662)</u>	<u>\$ 385,997</u>
